

Respected Sir/Madam,

I have been living in Australia since 2006. 4 years of my life had gone into struggling much for my future. I had almost spent more than \$ 50,000 on fees, medical, living expenses, traveling to uni on train , buying books and much of other living necessary things. Australia has given me everything I had ever dream of, starting from Education to better job and to better living with admiring facilities. As everyone know how hard it is to get your feet settled in a new Country, Thus after all the struggling time I have gone through, I came to the stand where the life of a person comes to relax and enjoyable. As a multicultural Country ,I have always been a part of it. Since 2006, The only dream myself and my family have ever had is of getting myself settled down in Australia and to serve this Country.After such a long period of time, i see my future in Australia.I was glad and proud,when my request for State Sponership was accepted and approved. Since than I had strong feelings that my future going to be in good hand from now. I have been waiting for the decision on my visa application very patiently, from last 1 and half year. My life was going well till the time I heard this new Amendments to the legislations. My heart broke down and dreams are shattered after hearing the new visa capping rule.

I request the Government and Minister of Immigration and Citizen to please special attention to all the people those who have lodged an application and waiting patiently from years. I also request the Government to please make a decision after taking everything into consideration.

Thank you,

Yours Sincerely,

Guri,  
Western Australia
