

Environment Protection and Biodiversity Conservation Amendment (Independent Expert Scientific Committee on Coal Seam Gas and Large Coal Mining Development) Bill 2012 [Provisions]

I would lodge my objection to any form of sourcing coal which has any similarity to the situation in the United States of America which has caused so much devastation to the environment, the people's drinking water, and who knows what long term effect to our planet generally.

PLEASE do not permit anything which will have any adverse impact on the environment in which we live - and in particular, methods which are offered only as a means of making money for companies or our government.

PLEASE think ahead in terms of impact on our families, and their families, and their families - **some actions can never be reversed!**

Glenda Marshall
