I am concerned on many many levels, regarding the continued construction of wind towers in big big numbers around Portland Victoria. There is mounting evidence, and a great collection of evidence where towers have been erected & operating for a couple of years or more, especially where people live, eat & sleep nearby. Already there have been many people selling up or having to move from their family homes due to the sicknesses that the towers are causing various family members, even pets too have been sick.

It is also devaluing many peoples beautiful homes. We need the people who have been elected to represent us to do something about all of this and of course those who earn from the towers on their properties aren't going to complain and most of them do not live in the location either.

Powercor and other identities know and agree that there are detrimental effects to people living and working in close proximity due to excessive noises generated and all the vibrational effects of the wind towers working. Kind regards

Nendy McGowan
