Topic: Senate Select Committee on COVID-19 - Written Question - 7

Question reference number: SQ20-000432

Senator: Katy Gallagher

Type of Question: Written. Hansard Page/s:

Date set by the Committee for the return of answer: 2 June 2020

Question:

Has there been an increase in the number of people receiving the age pension associated with increasing unemployment since the beginning of March? How many people have applied for the age pension since the beginning of March because they have lost their jobs?

Answer:

The Department of Social Services does not collect data on the reasons that individuals apply for the Age Pension.

Age Pension recipient numbers are driven by a range of factors, including: decisions about retirement; changes in eligibility age; the cessation of certain payments and movement of those recipients to Age Pension; changes in income and assets; and economic conditions.

See response to SQ20-000431 for details of recipient numbers and claims on hand since March 2020.

(a) 'Homeless' status is derived for a client based on the client's housing circumstances at the beginning of their first support period within the reference year. All other clients not meeting these criteria are considered to be at risk of homelessness (excluding clients who did not provide sufficient information to make this assessment). Housing circumstances are determined based on the client's type of residence, tenure and conditions of occupancy.

(b) Rates are crude rates based on the Australian estimated resident population at 30 June of the reference year, as detailed in the online technical information.

(c) Includes clients from 'Other territories' and those that have not provided location information.

Notes

1. Data presented have not been adjusted for partial or non-response (unweighted).

2. Clients are assigned to a region based on where they lived in the week before presenting to a SHS agency. Clients are assigned to only one region, based on the location details provided in the first support period in the reference year. Regions are defined by the 2016 Australian Statistical Geography Standard (ASGS).
