

Subject: Nuclear Waste
Date: Friday, 12 March 2010 8:52:23 AM

I wish to make it clear, I do not want any part of Australia to become a nuclear waste dump!

Mr Martin Ferguson should respect the wishes of the traditional owners of Muckaty, NT and find an alternative solution.

We all know radioactive dumping is a potentially devastating situation.

All you decision makers, with children....think again.

We have such exciting possibilities with Geo-thermal and other clean power, why not stand up to big bussiness and be heroes and leave uranium in the ground.

Every year I try and stay hopeful for the future of our species, however, your current behaviour, in regards to nuclear waste, makes it hard.

I hope you get strong and make the right decisions soon. You'd be surprised by the support you'd get!!

Kind regards
Cotti Radonyi
