Hi, Rachel Siewert asked for a rough percentage of what my cash component was. I did answer roughly but forgot to mention the percentage amount. I pay rent as per my contract with cash directly deposited, I also pay car finance through direct debit which will be taken from my cash component if the card comes here, and lastly I take out cash for markets, fruit, veg and the butcher for meat, and for second hand goods. So over all, my cash component that I need to budget for would roughly be around 70-80% cash each fortnight. Kind regards Crystal Silk
