Re: Submission for The Inquiry into the Energy Efficient Homes Package

17/2/2010

To Whom It May Concern,

If you are going to charge Minister Garrett with a crime of Industrial Manslaughter, you might as well charged other Ministers within the current Government and previous Government with crimes that is covered by their portfolio, for example you night as well charge The former Prime Minister J Howard with crimes against Crimes against humanity for helping to attack another Country based on lies resulting in the deaths of innocent people or you might as well charge say the Transport Minister for deaths on our roads and talking about deaths on our roads, why isn't there a Royal Commission into these deaths?

Regards

K Vaughan
