To
The Senate committee
Parliament of Australia

Sub: Consideration Of our Situation in relation to the new migration amendment bill 2010

Dear Minister,
To the reference of this bill and the interview of the immigration minister (Honourable Chris Evans) I would like to make some requests in this regard.
I am international student from India came here to study hospitality .I have finished my advance diploma and are on Temporary Graduate visa. I would like to highlight the main barriers which I passed.
I am working in my respective field since 2.5 years. I think that committee should consider those people who are still working in their field's .So that the people who are working in their fields don't get cheated. I have the all requirement which should be there in a genuine skill worker and I can prove that. To acquire all these I faced lots of hardships and still facing it. Some of them are as follows:
1. Problem in getting job in respective field due to different background.
2. Went through very hard training from experienced chefs.
3. Problems in managing time with work and college.
4. Problems in accumulating the documents like IELTS result, Police clearance etc.
5. The most important thing is "TIME AND MONEY "that I have spent to get my skills in hospitality industry.
6.Went through the family problems back in India.

To be a genuine skill worker in Australia I represent myself from all genuine applicants who are awaiting there decision. So they can start their life in a better way in this country and contribute to the country in the long run.
As a individual I have all the conditions to be eligible as a skilled worker in Australia. Some of them are:
1. Completed Advance diploma in hospitality
2. Scored 7.0 Bands in IELTS
3.2.5 years of Kitchen Experience as a cook and still working.
This is my kind request to the committee that please consider all aspects before presenting this bill in the parliament .This will affect the life of thousands of genuine applicants who are awaiting for the decision.
With regards
