

## **1. Monitoring Regime**

Gaming machines in the Northern Territory exist within Casino and Community environments.

### Skycity Casino

subject to standard casino regulation, gaming machines are monitored by the IGT Advanced Bonus System supporting both the X-series and ASP (crown) protocols.

### Lasseters Hotel Casino

Gaming machines are monitored by the Aristocrat DACOM system supporting both the X-series and ASP (tacs) protocols.

### Community

Gaming machines and Clubs and Hotels are monitored by a licensed monitoring provider, NT Tab Pty Ltd, utilising the OGLR QCOM protocol.

## **2. Data**

Information relating to gaming machine performance is collected by this Office and selective data is published annually, refer [www.nt.gov.au/justice/licenreg](http://www.nt.gov.au/justice/licenreg)

## **3. Regulator / Venues technology/communication protocols**

This Office has no direct technology based interface with gambling venues.

## **4. Pre-commitment work**

Our policy unit is working with the Senior Officials Working Group in regard to desired outcomes.
