

The Secretary
PJC Inquiry into Laws for Whistleblowers
PO Box 6100
CANBERRA

SUBMISSION:

I want to congratulate Senators Hinch and Xenophon for this Inquiry.

This link is a link to my Submission to the American whistleblower program through a homeless action group that, so far, arrested and sentenced quite a few high level lawyers and bankers in a very short space of time <https://www.scribd.com/document/312711630/Spencer-Murray-s-follow-up-report-to-the-American-SEC> We're fighting back through America. Please extend an Australian bounty scheme to average people who report things to a consumer-orientated action group.

I live in Australia's most marginal seat of Capricornia Qld (Michelle Landry) that's held by 77 votes. Think about that for a second.

My story with the Banks was on A Current Affair in 2014 and i objected to the Victorian Legal Board's attempt to spy on the tv shows that the Independents in Qld had underway on "60 Minutes". You wouldn't believe the antics these banks get up to to save themselves from exposure. Kindly make sure that you look at the strongest possible anti-retaliation laws that can deal with the many cunning ways that the banks and their cronies will use as payback and revenge. After I (and a few others) went on TV for a Royal Commission, word filtered back that Gadens and Minters used the Victorian Legal Ethics Board to grill their customers who were also on TV about what the Independent MPs and Lock The Gate had in store for tv shows like the 60 Minutes shows that Bob Katter and Rodney Culleton were on. I therefore believe that lawyer-free whistleblower services are essential. Banks should fund truly independent whistleblower services that are run by the likes of the carers group that helped the SEC and FBI make arrests.

Seasons Greetings.

Yours

Spencer.
