

Australian Government

Department of Defence

On 20 September 2012, the Minister for Defence provided the Committee with Defence's submission to the Senate Inquiry into the Administration, Management and Objective of Australia's Overseas Development Programs in Afghanistan in the context of the 'Transition Decade'. Unfortunately, Defence has detected errors in some of the figures provided in the submission.

The errors are associated with the work that the Australian Defence Force (ADF) undertakes in support of development in Afghanistan. The substance of the submission remains extant. As stated in the submission, in addition to working with the Afghan National Security Forces (ANSF), the ADF contributed to Whole of Government stabilisation and development efforts in Uruzgan Province, Afghanistan. Some of these contributions are designated as Official Development Assistance (ODA)-eligible. Annex A to the submission included some costs which were not ODA-eligible under the Organisation for Economic Cooperation and Development (OECD) Development Assistance Committee (DAC) Statistical Reporting Directives. Defence identified that the following costs which are not ODA-eligible under the Reporting Directives were incorrectly included in ODA-eligible Expenditure for Afghanistan:

- Force Protection costs in 2010-11;
- Other activities such as engineering elements and trade training activities across some or all years; and
- Direct project costs for some military checkpoints in 2006-07 and 2007-08 shown in table 2 of the annex to Defence's original submission.

The original Defence submission also detailed a total of 43 individual projects believed to be ODA-eligible in accordance with OECD DAC guidelines. After a further review of OECD DAC guideline compliance, two checkpoint construction projects (Serials 20 and 26 of the original Enclosure 2 to Defence's submission) have been deleted from the list as they were not in accordance with OECD guidelines. Correcting these errors has resulted in the cost of Defence's ODA-eligible projects from financial years 2006-2007 to 2010-2011 totalling AUD\$57.7 million and not AUD\$255.4 million as previously reported in Defence's original submission. As the 2011-12 figures have now been finalised, they have also been included, bringing the total ODA-eligible project amount to AUD\$66.0 million for the period 2006-2007 to 2011-12.

The details and figures in the revised annex are now in accordance with OECD DAC Statistical Reporting Directives and are included at Attachment A.

As a result of these errors, the Defence tables included in the response to Question on Notice 41 at the 28 May 2012 Estimates hearing were incorrect. These tables have been corrected and are at Attachment B. In addition, the errors resulted in inaccuracies in the Chief of the Defence Force's testimony at the recent Estimates hearing on 17 October 2012. Corrections to the Chief of the Defence Force's testimony have been provided separately. In response to Questions on Notice from the 17 October 2012 Estimates hearing, Defence will also provide updated tables including financial year 2011-12 and estimated costs for financial year 2012-13.

As transition in Uruzgan province progresses, the ADF continues to support development activities undertaken by the Provincial Reconstruction Team. Defence hopes the attached corrections will be of assistance to the Committee's inquiry.

Note: 1. No further breakdown of actual projects can be provided. QIPs provide a short to medium term development effort at the local level. The aim of a QIP is to provide funding for materials, labour and/or local national specialists; advisors that benefit a wider group of people normally a village or community group. The stated goal is to provide entry into local communities, thereby facilitating closer engagement with key leaders and the community as a whole.
