SUBMISSION TO THE SENATE

RE: THE TAX AMENDMENT BILL (PUBLIC BENEFITS TEST) 2010

It appeared that the finer points of this bill are as follows:

It would mean that it will create an enormous amount of cost and time consuming administration requirements for both the organisation and the government to administer.

that the minor groups, for example local clubs that increase the quality of life of their group, just like youth groups, play groups will not be able to comply with the administration hence they cease to exist and will disadvantage the community.

in order for religions to qualify they would have to service those of other faiths which will create tension, mistrust between the denominations.

the bureaucrats interfering with the decision making of the religious denomination. whatever happened to freedom of religion.

THAT I OPPOSE the passing of this bill. It is unfair, unconstitutional and it divisive because this will create tension and divisions within the community.

Yours truly,
