

Dear Sir/Madam,

I have been living in Australia from last three years and have done my Accounting Degree. I have paid a large sum of money to get graduated and make my dreams (of becoming Professional Accountant) to be true.

I have stayed legally in Australia doing three years Accounting degree in two years time and been awarded with scholarships with marvelous academic record. I have planned all my future life here. I have planned to do my CPA and then specialize in Forensic Accounting which is my aim to be. Those highly achieved scores and two years of hard study (spending more than \$50,000) would be of no use if our visa applications would be terminated or capped.

I have my sister living here with me from more than 2 years who is Australian Resident and she is a marvelous teacher. The only reason she is staying here is because of me. If that bill affects our application then our whole future will be razed.

I have spent a quality time in Australia and really appreciate its friendly multicultural environment. So this is one of the reasons I want to stay in Australia. Another reason to stay in Australia is that It has given me an opportunity to gain every kind of experience in personal, social and professional life. I want to be a part of Australia and bring my qualities in use to help it grow more and more.

We have trusted Australia a lot to keep their laws same, and serve immigrants. And we came here to serve Australia and see it growing being a part of it. But that seems like not happening at the moment. Our parents sent us so far away from home just to study and make our carrier. We staying here, missing them everyday being far away, just in a hope that we are making good future here. But here seems just a blur, not a future. This bill can ruin so many families, lives and can bring really worse case scenarios for thousands of people.

So please take a proper and fair decision (taking into consideration people's time, money and emotions they spent here) regarding visa applications.

Thanks

Regards

Prince Mahna
