

This is an urge regarding the recently parliament Bill Visa Capping 2010 . Dear Hierarchical Authorities, Top management officials and Parliament members. Before implementing any legislations/bill passing, Just for a week think your life as an international student in such scenario.

There is no second thought the Australia is the one of the best countries in this world to live in every prospective. How fair is it to providing accommodations ,food, medical facilities, employment to the refugees from Government funds to people who don't have even any legal identification's and illegal pathways to migrate Australia (Ratio doesn't matter) contrasting International students who abiding all rules and regulations, Paying fortune for there Studies and Living's in Australia in Hope of there Bright Future prospective.

Myself is a one of the international student's who studying Accounting and working here in hope for bright future prospective and wish to stay in Australia with my family already residing here. I recently filed my TRA having 7 bands in IELTS instead of my Permanent resident application just because of legislations and Assessment criteria had been changed on 1 January 2010.

Being residing and spending here 3-4 years here with my sister, nephew and niece .Having friends and relatives over here. Its very disappointed to heard such legislations will be enforced to send back to Home country.

Having inadequate infrastructure the diversification of migrants to regional areas can be the best solution instead of ceasing visa classes. This Visa capping seems like Monopoly against international students.

At last I request all decision authorities to be fair implementation of rules and legislations appreciated by everyone in a lime of Australian Economy.

With Regards
SAHIL ABBI
