30. 01. 2012

I have always believed Australia to be a fair country with social justice (a dream country/lucky country). After having watched Our Generation in Germany, I was shocked to discover that it's one of the most racist countries. This is such a disappointment to me. Hence I am taking the trouble to write/make a submission to the Senate Committee because of this concern. I had never thought Australians to be hippocrate in their treatment of Aboriginal peoples and had always held them in high regard.

Best regards

Gisela Gaflig
