Senate Inquiry Submission
Paid Parental Leave
Department of the Senate
PO Box 6100
Parliament House
Canberra ACT 2600
Australia

To Whom It May Concern:

We the undersigned would like to point out to you the following issues concerning unfair provisions of the Bill, making

1. **Exclude abortion funding** - The Bill gives Paid Parental Leave for stillborn babies. In many cases aborted babies reaching 20 weeks gestation or 400g in weight, who are born dead or alive (to die subsequently) are recognised and recorded in Birth Registries as "stillborns". To avoid any doubt, amend the Bill to ensure Paid Parental Leave funding does not go to babies who are stillborn or die after birth as a result of elective terminations.

2. Equal payments, should save taxpayers and business costs

Equal funding for all mums would be simple to calculate and administer. Amend the Bill to deliver this funding via the Government (similar to the current Baby Bonus payment means) and save taxpayers and business the unnecessary, high costs of using businesses as the "government paymaster".

3. Amend the Bill to remove the "work test" and the "income test" from the Bill

These tests unfairly exclude unwaged mums doing their own childcare work between pregnancies. This is unfair! All families reduce income to pay for childcare - whether parent care or outsourced care (eg. day-care).

Why should federal government funding punish families for their long term choice of "parent care"? Amend the Bill to remove the "work test" (sections 32 to 36 of draft Bill) and the "income test" (sections 37 to 41 of draft Bill).

4. The proposed discriminatory Paid Parental Leave will not boost fertility
There is no proof that Paid Parental Leave will boost Australia's fertility. After
30 years of Paid Parental Leave and heavily subsidised day-care, the Swedish
birth rate is behind Australia's. Sweden has more generous paid parental leave
than any nation, but its fertility rate in 2007 was just 1.66
http://www.indexmundi.com/sweden/total_fertility_rate.html – compared with
Australia's 1.93 http://www.medicalnewstoday.com/articles/117701.php)

5. Paid Parental Leave will not "pay for itself"

The Explanatory Memorandum to the Bill says "It is expected that the cost of the scheme will be **offset** by **increases** in <u>tax revenue</u> and by **reductions** in <u>baby bonus</u> and family tax benefit Part B outlays and tax offsets for people receiving parental

leave pay." (underlining and bold added). These offsets will go nowhere near funding this expensive scheme that no individual can "afford". It is more likely, as in Sweden, that this costly scheme will not pay for itself and will result in increased taxes.

The costs of the scheme will expand annually as more women are forced to get paid work in order to get preferential funding. It's government funding, it should go equally to <u>every</u> child born.

6. Paid Parental Leave is discriminatory "childcare funding"

It funds "short term parental childcare" but discriminates against families that use parent care long term. For example families where mum cares for a baby beyond 6 months of age or between pregnancies, risk missing out on Mr Rudd's Paid Parental Leave for their 2nd or subsequent child. Paid Parental Leave is really a Bonding Time Reduction Scheme. The only way to increase bonding is to give the same funding to support mother bonding for every newborn.

7. Double dipping - There appear to be no safeguards in the draft Bill to stop mothers claiming PPL but putting their newborns into day-care and "double dipping" by claiming the 50% Child Care Rebate.

8. Amend the Bill to eliminate discrimination

Peter Mac Ginley
