

100% behind this bill to prevent any future secret deals between government and business without full transparency.  
Covid gene therapy was/is a commercial fabrication.  
The virus itself has never been isolated - Dr. Sam Bailey (NZ).  
Therefore, the covid PCR test is meaningless. Especially when it's cycled above the recommended threshold.  
Asymptomatic infection exists because humans carry a number of covid viruses.  
I remain appalled at the response of health experts and governments management of covid in australia.  
I demand a deep, thorough investigation of the assessment to grant unquestioned indemnity to suppliers of a largely untested gene therapy which was brutally pushed onto our population.  
Thank you Sen Babet, et al.
