

The Australian Aviation
Associations' Forum

Statement in Support of ATSB and CASA

The Australian Aviation Associations Forum (TAAAF) fully supports the findings of the June 2017 fatal Angel Flight accident near Mount Gambier.

We believe that the report is thorough and accurate, and addresses serious concerns held by many people in the Aviation Industry for some time.

Furthermore, the TAAAF also supports the new minimum standards recently published by CASA for the conduct of Angel Flights.

The Australian Aviation Associations Forum is an alliance of the majority of Australia's major aviation associations to ensure the industry presents a united voice to Government on key aviation issues and policy, characterised by expertise and a wide representation of people and organisation committed to aviation. The Association currently comprises 13-member organisations collectively representing more than 12,500 individual and business members.
