To Whom it may concern.

Why would Australia spend so much money (our money, the people's money) on something that would put us in a volatile position with China?

America and Britain are both crumbling sick societies with useless political leaders, and here we are following their lead.

Wake up Australia before it is too late. You are killing us, our land and my grandchildren's future with stupidity.

Enough of the fat cat white men making decisions, that are more about a bunch of boys playing war games than the health and future of our country.

I am a concerned citizen and I am begging you to change.

Jennifer Lyons
