

Active Participants split by State, Electorate (CED), New/Existing

Data as at 31 March 2021

Notes:

The underlying assumptions for the March results are:

- Based on the number of active participants at the valuation date.
- The State and Territory groupings in the March results are based on the participant's latest residential address.
- Electorate names in this report are based on 2018 geographical boundaries.

The table states the number of participants and the number of providers split by the different Commonwealth Electorate Divisions (CED's) within each of the different State/Territories that they are located within. All Electorates across Australia are available, but some Electorates in Western Australia may not be mature.

A participant is considered an 'Existing' participant if they entered the scheme via a previous State/Commonwealth program (before the existence of the NDIA) and considered 'New' if they entered the scheme via the NDIA.

This is determined using the access entry type determined from State/Commonwealth data loads.

The "Other*" Electorate category within each State/Territory contains information for the following:

- Missing Electorates: some participants are missing Electorate level information.
- Small numbers: captures participants who are in Electorates with fewer than 20 participants.

The "Other" State/Territory contains information for the following:

- This category includes participants living in Norfolk Island, Jervis Bay, Christmas Island and Cocos (Keeling) Island.
