

ATTENTION: SHONA BATGE

Our association has worked with ForestWorks for some time and we are part of its working groups and timber industry liaison network.

In our opinion ForestWorks accurately and reliably represents the views of our industry on skills and employment issues and has the support of the industry and, in our view, the current Government.

We value ForestWorks contribution and advice as well as the knowledge they provide towards skilling the current and future workforce.

In the view of our association ForestWorks are a key component of the timber industry and we need their Industry Skills Council role to be continued.

Regards
