Re: Currency Bill 2019

Dear sir/madam,

I herewith would like to make known that my family and I have big problems with the proposed Currency Bill 2019. I thought we are living in a free, democratic country where we have certain liberties. I should have the right to spend my hard earned money (after paying taxes) the way I want to (and pay tax again).

With this bill I can see where we are going in this country. No more cash, everything digital and the big companies (together with the big accounting firms) will still pay a lot less tax than me. I do not wish to be pushed into a corner where the only option is to keep my money at a bank with the risk of this company failing, the bail-law and paying money for the bank to have my money.

I demand a public hearing in this matter!

Kind regards,

Carolus Broers
