

SUBMISSION TO THE SENATE STANDING COMMITTEE ON RURAL AFFAIRS AND TRANSPORT

SUBMITTED BY WAL MITCHELL. PAST NSW SHIRES PRESIDENT AND MAYOR BOURKE .

THE FORMULATION OF A MURRAY DARLING PLAN IS INDEED A VERY COMPLEX TASK , AND HAVING LIVED ON THE DARLING FOR OVER SEVENTY YEARS , I BELIEVE THAT THERE ARE MANY IMPORTANT ISSUES THAT HAVE NOT BEEN PROMULGATED

THE WHOLE ISSUE OF DARLING RIVER ENVIRONMENT AND ECOLOGY EXIST AS A VARIABLE FLOW REGEME WHICH THROUGHOUT OUT SHORT HISTORY CLEAR..LY DEMONSTRATE THAT SEASONAL PATERNS EXIST WHEREBY LONG PERIODS OF SEVERE DROUGHT ,AND NORMAL AVERAGE SEASONS -- ARE INDISPERSED BY PERIODIC HIGH FLOW FLOODING EVENTS THAT INUNDATE THIS MASSIVE FLOODPLAIN FOR WEEKS AT A TIME

THE TOTAL RIVERINE SYSTEM HAS BEEN EVOLVED OVER MILLENIA TO COPE.... I LIVE ON THE DARLING AND I HAVE SEEN THE RIVER STOP FLOWING HERE AT LOUTH EVERY 19 YEARS 1945 1964 1983 2002 IN THE DROUGHT OF THR 40'S THE DARLING CEASED TO FLOW FOR 308 CONTINUOUS DAYS

I THEREFORE FIRMLY BELIEVE THAT THE LOW FLOW SEASONS ARE PART OF A PATTERN THAT HAS TO BE UNDERSTOOD AND THAT THE DARLING CANNOT BE EXPECTED TO DELIVER SUSTAINED FLOWS TO THE MURRAY SYSTEM EVERY YEAR .

I ALSO BELIEVE THAT THE ECOLOGY OF THE DARLING RIVER FLOOD PLAINS CLEARLY DEMONSTRATE BY THE VERY SPECIFIC VEGITATION AND TIMBER VARIETY DISPERSAL THAT THEY ARE A FULLY INTEGRATED SYSTEM ESTABLISHED AND CONTROLLED BY THESE HIGH VOLUME PERIODIC INUNDATIONS. AND LONG DRY PERIODS ..

TO SET LEVELS OF GAURANTEED DELIVERY OF DARLING RIVER WATER FLIES IN THE FACE OF ESTABLISHED FACTS..

WHEN THE C A P WAS IMPOSED IN N S W CATCHMENTS MANY VALLEYS HAD 20% TO 30% REDUCTIONS THE BARWON DARLING WAS SLAMMED WITH A 67 % CUT THE VAST SURFACE OF THE MENINDEE LAKES SYSTEM , 120,000 ACRES LOOSES 2 METRES PER YEAR EQUATING TO OVER 700 ,000 MEGALITRES ..THE APPLICATION OF THE PLANNED REDUCTION OF THE AREA WOULD CONTRIBUTE THE DESIRED AMOUNT OF DARLING RIVER WATER TO THE MURRAY WITHOUT FURTHER DESTROYING THE OPERATIONAL VIABILITY OF UP RIVER IRRIGATORS AND THEIR DEPENDANT TOWNS AND COMMUNITIES ..

BROKEN HILL WAS ADEQUETLY AND SECURELY WATERED DURING THIS RECENT DROUGHT BY HOLDING THE DARLING RIVER AT WEIR 32 AT MENINDEE WHICH BACKS THE DARLING UP TOWARDS WILCANNIA IN A CLAY BANKED TIMBER SHELTERED STORAGE WHICH PROVED TO BE THE LOGICAL ANSWER....

I ENCLOSE A PAGE OF DARLING RIVER FLOOD HIGHTS THAT DEMONSTRATE THAT HIGH FLOOD LEVELS DO NOT DELIVER HIGHER YEILDS TO THE MURRAY AS A LARGE PERCENTAGE IS SOAKED UP IN THIS MASSIVE DARLING FLOODPLAIN . WHICH DESERVES AND GETS ITS TIME HONOURED SHARE....AS A VAST ENVIRONMENTAL ALLOCATION TO THIS PRISTINE EPHEMERAL LANDSCAPE AS MUCH A 60 KM WIDE..

I RESPECTFULLY INVITE ALL MEMBERS TO COME AND VISIT THIS EVOLVING PHENOMINA ..

YOURS FAITHFULLY,

WALTER HENRY MITCHELL A M

DARLING RIVER FLOOD HEIGHTS 1971 - 1997
