

To whom it may concern,

I am a 3rd generation farmer, located on the Liverpool Plains, NSW. Please don't undermine our important work of nourishing our society, by allowing the rapid expansion of CSG and Coal mining in this area. The extractive industries, and farming, cannot exist side by side, without farming coming off 2nd best. Water is, arguably, our most important asset, and there are just too many unknown variables associated with CSG to allow it to proceed at the pace it is. We need more independent and rigerous assessment of whole-catchment impacts. We, as landholders, need to be able to say enough is enough. We dont want CSG near us.

Thanks

Brett Sanders
