

Donor Conception Federal Enquiry

My name is _____ I am almost 11 years old. My mother had me because donor conception was possible.

Mum has always told me how the doctor had to help her get pregnant & that my father & her both signed papers approving for me to meet him one day, which I really want to do. People being born now through this program can find out who their fathers are, why can't I? It doesn't make any sense. The medical records & legal documents are all with the doctor who helped my mother.

My little brother will never know his biological parents as he was abandoned. The only reason I may never know who my Dad is, is because someone in the government doesn't understand how important it is or just can't be bothered.

Please change the laws so that I can find out who my father is & other kids like me can do the same. My mother says one day I may need access to his family medical history in an emergency, but unless the laws are changed I can not do this. It doesn't make any sense at all.

There are many times that I cry as I need to know who my biological father is. There is no reason for me not to know. I know how cruel some government people can be as we have been through an adoption, but the current rules are very unfair. And impact on so many innocent lives.

Thank you in hope.....
