

I live in Ogmoores QLD 4706 CSG does not only effect the Murray Darling Basin it effects everybody. The QLD Government have issued permits for the whole of Ogmoores that means a drilling company can come onto my block and drill. I contacted the QLD Government Dept of Mines & Energy they confirmed that permits for Ogmoores had been issued. But told me the company would not drill in Ogmoores then why issue permits. The company has a legal right to drill on any block in Ogmoores we cannot stop them the ordinary person has no rights.

Also the Chinese coal company that has the rights for the Liverpool Plains in NSW. The ABC's Landline said they can only extract coal but they have already leased land back to one farmer. What will happen to the crop he produces is it the property of the Chinese coal company if so they will want the crop for China. As more and more of Australia's prime agricultural land is sold to foreign interests what will happen to our food security. As is now some of our vegetables come from overseas we pay whatever the price is now. But when we cannot produce any food the price will be whatever they want to charge. E.G. if the price is say \$5.00 kg now what is stop whoever we buy from charging \$5,000.00 kg or \$50,000.00 kg.
