

To whom it may concern

I am a passionate advocate of alternative energy, and as a result support Pacific Hydro's continued push towards generating more and more ecologically friendly power through their wind farm programme. While there is no doubt that there is enough solid fuel in Australia to keep industry and households running for the foreseeable future, the effect on the climate is becoming catastrophic. I want to bring my children up in a country that embraces the natural conditions (wind and sun) to provide clean and renewable energy.

Kindest Regards

Rupert Elvins
