

Dear sir, madam,

I would like to ask why the govt is still pushing ahead this WSA airport? In these times of aviation being reduced and being unviable. Why not redirect the almost cleared land into a more innovative use. Not an old fashion dirty idea. They can put in a very fast train hub. Science parks, green space. Local industry.

An airport will increase the heat sink which already makes the area the hottest area in Sydney, and cause the people of western Sydney and the blue mountains hell resulting in people to die. . a rethink must happen.

Yours sincerely

Jenny Dollin
