Too Whom It May Concern

On 14th July 2014 we received information from the Oakey Army Base that our bore water was contaminated and not to drink it until further notice,well that further notice has never came, we are very confused and angry .There has been a number of meetings with the Defence and every time we come away none the wiser,our life has been put on hold and it is very frustrating.We are up in the air and don't know what to do.We were going to sell our property and retire as it is our super, now that is out of the question as our property value is non existent.This is the doing of the army not us ,we are paying for their negligence.Aside from assistance from Shine Lawyers,we have had no real say in what is happening to us and we believe left hanging indefinitely unless your committee assists us. We feel our government representatives are doing nothing for us and we feel helpless.

Yours Sincerely.

Graham and Julie Banks
