Dear Committee members

I hereby make this brief submission in favour of the Vaccine Indemnity Bill as raised by Senator Babet of the United Australia Party.

It is highly unreasonable for the government to expect tax payers to fund compensation for people injured by a vaccine.

The onus of responsibility should lie solely with the vaccine manufacturer.

We have seen too many people injured by vaccines (particularly the Covid vaccine) and these people have no recourse via the government as the compensation scheme they established has such narrow parameters.

Injured vaccine recipients should be able to take direct action against vaccine manufacturers as should governments who promoted the vaccine based upon manufacturer assurances of safety.

I ask that you please uphold this bill.

Regards

Karen Quinn
