Subject: Senate Enquiry Into The Water Act 2007 Regarding Murray Darling Basin Water Allocations

Dear Sir / Madam:

- The Water Act 2007 reflects more fairly a balance between Environmental & Economic concerns & should not be altered in any way.
- The current extraction of water for irrigation is unsustainable & used for far too long The Water Act 2007 acknowledges that there is a need for a balance.
- The data used for The Water Act 2007 is based on the best available scientific data / facts.
- Facts should not be disregarded for Political persuasions.
- The Murray Darling ecosystems of Wetlands, Flora & Fauna after decades of abuse are almost totally devastated.
- Without The Water Act 2007 the value & importance of this precious ecosystem could be lost forever.
- This plan for the Murray Darling basin could be the last opportunity to restore this River system to a level that will be there for the whole community to enjoy & benefit from.

Thanking You

Alan Carpenter
