

# Barkly College Students against the Muckety Waste Dump

We are appealing to you today to urge you for your support in our effort to stop the nuclear waste being dumped at Muckety Station.

We are concerned about our future. The proposed waste dump could pose serious health issues for our community in the future and we believe that this is grossly unfair. It was the multinational mining companies in conjunction with Commonwealth Government who created this waste, and we believe that it is them that should take responsibility for the mess.

The future of our community hangs in the balance with the decision of whether or not to put the waste dump in the middle of the Barkly region. While we do not have the population density of our city counterparts down south, we believe that our health, well being and future are just as important. Regardless of the voting power our community has, we are still Australians and should be entitled to the same rights as all other Australians.

We thank you for taking the time to hear our concerns and we hope we have your support in this issue.
