### Education Services for Overseas Students Amendment (Quality and Integrity) Bill 2024 [Provisions]

#### QUESTION ON NOTICE

Date of hearing: 26 August 2024

**Outcome: Higher Education, Research and International**

**Department of Education Question No. IQ24-000027**

Senator Sarah Henderson on 26 August 2024, Proof Hansard page 66

#### ***Certificate of enrolment letters issued***

##### **Question**

Mr Rimmer: When an international student accepts an offer to study in Australia, they're issued a certificate of enrolment. They, effectively, take that certificate of enrolment to the Department of Home Affairs in their visa application process, and the certificate of enrolment is considered as one factor in the student visa application. That's the system that is currently in place, and that's the system that will be in place in future.

Senator HENDERSON: How many certificate of enrolment letters have been issued?

Mr Rimmer: We'd have to take that on notice.

Senator HENDERSON: This is a really important part of our scrutiny of the bill. I'm disappointed you don't have that data. Could someone quickly scramble around and provide it and bring it back to the committee?

Mr Rimmer: I don't think we can do that in the time that we have available this afternoon. We would need to look at the aggregate of 2025 certificates of enrolment for all providers, and that's not data that officers at the table have to hand.

##### **Answer**

As of 29 August 2024, there were **177,741** unique students collectively holding **195,272** Confirmations of Enrolment due to commence in 2025 across the higher education, VET, schools, ELICOS and non-award sectors. Students may hold multiple Confirmations of Enrolment for a number of reasons, including course packaging and some students being accepted by multiple providers.

After excluding courses that will not count towards the 2025 National Planning Level (for example Schools, and higher degree by research) **87,549** Confirmations of Enrolment will count towards provider limits and the National Planning Level should those students commence their courses.

Date of hearing: 26 August 2024

#### *Details of significant data discrepancies and correspondence*

##### **Question**

Senator HENDERSON: But I would put to you, Mr Rimmer, that I've heard directly, and we've heard today, from a number of universities that the Department of Education had completely the wrong data and was completely all over the shop in terms of even understanding the number of international students studying at any given university. I've got two compelling examples. I won't name the universities, but I've got two very compelling examples where the department was completely wrong.

Mr Rimmer: For its data systems, the department relies on the quality of the data that's input by providers. Universities are under an obligation, depending on the data under both the HESA—

Senator HENDERSON: No, sorry, Mr Rimmer. The department—

Mr Rimmer: Can I finish my answer?

Senator HENDERSON: The department got this wrong. The correct data was provided by the universities, and in both cases the department came back with vastly different numbers. So how could that have happened?

Mr Rimmer: I don't agree with the way that you've characterised that. The department has relied on data that was provided by universities. I'm happy to say that, in some instances in the last three or four weeks, as we've, in a collegiate way, worked with colleagues in the sector to explore this data, we've discovered that the university-entered, university-accountable data is not accurate—in some instances, by some thousands of student records. That's not on the department. That's on the providers, who are under a legal obligation to provide accurate data—

Senator HENDERSON: Alright. In the case of where the data was wrong, Mr Rimmer, could you provide to this committee on notice the details of those data discrepancies, which are significant. As you say, in one case, the department was out by many, many thousands of students. So could we please have the details, including all relevant correspondence about these matters, so we can interrogate this issue, because, if you have the wrong data and you do not know how many international students there are in the system, how can you possibly administer the caps, given the current systems? I would put to you that there are deep concerns about the incoherence of the systems between the Department of Home Affairs and the Department of Education.

##### **Answer**

Universities supply data to TCSI under the legislative authority of the Higher Education Support Act (HESA) and they verify the quality and accuracy of the data they supply annually. They do this by viewing a report with their submitted numbers and a senior staff member verifies that the data are correct and complete. All data fields within TCSI have clear specifications and providers are expected to provide data that comply with them.

Universities understand that the data they supply will be used for publications and funding allocation. The department undertakes its own quality assurance process and continues to work closely and collaboratively with all providers to ensure that TCSI data are accurate.

The data quality issues referred to by Mr Rimmer relate to data supplied and verified as correct by universities in May 2024 in relation to the term address and residence status of their students in 2023.

There were two issues identified, both of which have since been addressed to give the department confidence about the numbers it is using, related to the calculation of the proportion of onshore international students at each university within the total onshore student population (international concentration).

The first matter relates to the currency of student term address data, which has not previously been used for a material calculation. During engagement with universities to check this data in August, it was apparent that 'term address' data were poor quality due to the universities' reliance on student reported information. Universities raised with the department that they were not confident that their term address data accurately recorded the location of their students in 2023 and may underestimate the number of onshore students. As a result, the department ceased the use of 'term address' data from its calculations and will now take steps to work with the sector to improve the reliability of this field.

Revised international concentration calculations were produced using the citizen resident status data field. A second matter associated with a single provider was identified as part of the quality assurance process undertaken by the department. Discussions were held with the provider and these resulted in corrections being made by them to the TCSI data they had previously verified as accurate, and these corrected numbers are now being used in the relevant calculation.

**Department of Education Question No. IQ24-000029**

Senator Sarah Henderson on 26 August 2024, Proof Hansard page 67

***Number of prospective international students***

**Question**

Senator HENDERSON: How does that translate? Sorry to jump in. How does the confirmation of enrolments translate to how many students there are? How many prospective students are you looking at right now? Do you know that number?

Mr Rimmer: Senator, I think we're going round in circles a little.

Senator HENDERSON: No, excuse me, Mr Rimmer. We are not going around in circles. I've already explained to you that one student can be issued with multiple confirmations of enrolments, so I've asked for how many confirmations of enrolments have been issued and how that translates to the number of students. So how many prospective international students are coming into Australia in 2025? Please don't accuse me of going around in circles. It's a very important question.

Mr Rimmer: We've taken that question on notice.

Senator HENDERSON: No, you haven't. You took the one about confirmation of enrolments on notice. I'm asking how many prospective international students are coming into the system.

Mr Rimmer: We'll take that on notice, along with the previous question.

**Answer**

Please see response to IQ24-000027.

#### *International students and provider level data*

##### Question

Senator HENDERSON: ...I'll ask about the provision in relation to course caps. Do you have data relating to the number of international students enrolled in each course offered in this country?

Ms Sandercock: There are some 25,000 courses registered on CRICOS. We have over 800,000 international student enrolments. We don't have the data broken down by all of those courses with us, as you would anticipate, but that reflects the scale and the size of the sector.

Senator HENDERSON: What about at a provider level? Have you got that data here today? How many international students are at each higher education provider?

Ms Sandercock: Let me take a look. We may be able to give some of that data.

Senator HENDERSON: Because there are nearly 200 providers, I'm going to ask if you can take that on notice and provide that list to me.

Ms Sandercock: Certainly.

Senator HENDERSON: For every higher education provider, could we please have the total number of international students, both at a domestic and postgraduate level.

Ms Sandercock: We'll take that on notice, certainly.

Senator HENDERSON: Separately, could we please have a list of the 25,000 courses. I imagine that data is all there.

Ms Sandercock: That list is public. It's recorded on the CRICOS database.

Senator HENDERSON: How many international students are registered for each course? Can you provide that data as well?

Ms Sandercock: We can take that on notice

##### Answer

The most recent published data on domestic and international enrolments at higher education providers is available here: [Selected Higher Education Statistics – 2022 Student data - Department of Education, Australian Government](https://www.education.gov.au/higher-education-statistics/student-data/selected-higher-education-statistics-2022-student-data) (<https://www.education.gov.au/higher-education-statistics/student-data/selected-higher-education-statistics-2022-student-data>)

Overall enrolments for the higher education sector (all providers) May 2024 year to date (YTD) are below:

Course level	Number of enrolments (May YTD)
Undergraduate	173,908
Postgraduate	225,519
<b>Total</b>	<b>399,427</b>

Source: PRISMS.

These data are enrolments, not headcount, and a student may have more than one enrolment.

Provider level enrolment data held in the Provider Registration and International Student Management System (PRISMS) is commercial in confidence.

Attachment A list courses registered on the Commonwealth Register of Institutions and Courses for Overseas Students (CRICOS) and enrolment for each course as of May 2024 year to date. Courses with no enrolments in 2024 have been removed from the list.

**Senate Standing Committees on Education and Employment**

**Education Services for Overseas Students Amendment (Quality and Integrity) Bill 2024  
[Provisions]**

**QUESTION ON NOTICE**

**Date of hearing: 26 August 2024**

**Outcome: Higher Education, Research and International**

**Department of Education Question No. IQ24-000031**

Senator David Pocock on 26 August 2024, Proof Hansard page 68

***International offers that have translated into certificates of enrolment for 2025***

**Question**

Senator DAVID POCOCK: ...I'm interested if you have any data on how many offers for international students that have already been given for 2025 will be impacted by the caps. Mr Rimmer: That's a matter that we are looking at closely. We will be able to come back to you on notice with data about international offers that have translated into certificates of enrolment in the system. At the current time, we're not aware of certificates of enrolment that will fall into the category that you just described, but we will come back to you with data about the certificates that we're aware of.

**Answer**

Please see response to IQ24-000027.
