

Dear Brittany,

We are pleased to inform you that researchers from the National Allergy Centre of Excellence had a paper published in [Tropical Medicine and Infectious Diseases](#) yesterday titled: "The Human Health Impacts of the Red Imported Fire Ant in the Western Pacific Region Context: A Narrative Review".

It may be too late, but we wanted to forward this to you as it could be assistance to the Senate inquiry in addition to the NACE and A&AA submission.

Kind regards,
Thilanka
