

How dare the Government still take control of Aboriginal affairs in such a racist and inhumane manner. Aboriginal people are more than capable of caring for self and communities. Look what they did in Qld with the Alcohol Management Plans. Where do the people come to the cities, when they prefer to stay at home, the results of this high incarceration rates, family and community breakdown . Government again making decisions that affect the lifestyle of individuals, families and communities. Government interventions are imposed with no consultations from communities. Decisions are made prior to consultation and community input is railroaded to reflect PRE-EMPTED DECISIONS.

How do you consult, a telephone call to someone in the community or visit and speak to a range of community members. These Government imposed laws need to stop they are of no help and only make matters worse. Then the Non Indigenous people have a field day with racist attitudes . Let the Aboriginal people of this country make their own decisions in the way life is to be lived. As Aboriginal people we need to make a stand and say enough is enough. I congratulate the people on Australia Day for taking a stand once again. Where have all our fighters gone for the Struggle of Aboriginal & Islander people. As Aboriginal & Islander People we must take a stand together against the government and fight for what we believe is to be right.
