

Dear PM, Immigration Minister & all the Immigration Authorities who has made this Bill

Why not?

In my view, This 'Bill' is one of the worst creations after the 'White Australian Policy'. The Bill shows the government who is selfish and without any confidence. It is like inviting the people to Australia, collecting their taxes, fees for medicals, IELTS, other costs (some of the applicants are waiting for 3 years and have paid these fees multiple times) and then make fun of these professional people from all around the world. We are not 'asylum seekers' who came to this land illegally or uninvited. We (students) were shown on websites of Immigration and Australian Universities that our skills are in demand and study in Australia will gain extra points towards migration, thus we took decision to come here, mortgage our properties and sacrificed our social life in hope to settle down in a good country (same hope that your ancestors carried when they came to this land and also went to courtiers like India and Africa to settle). I had taken an education loan from a developing country to come here and study/earn back and support my family. After completing course (spending more than \$60,000 for Australian economy) in Sydney, I saw the immigration website in September 2008 – 6 month processing time for on-shore GSM, I did not had money for applying the visa. I borrowed from friends and put in the application that after receiving PR, I would get a nice job (on bridging visa no employers want us). I have been waiting since after spending \$3000 (Visa) + \$800 (Three time medicals) + \$350 (Ielts). I have seen what others have submitted in oppose to this bill, Look at it how stupid it would to go through.

Hello, we are in Australia already and helping the economy, how can you say economy does not need us. We do not depend on centre link or oher benefits.

My ancestors have fought (Sikh regiment) for the wars along with British and Australian army in ww1 ww2, do we deserve to be treated like this? Do not have any rites on the land and water given by the nature.

What will happen if the Bill Pass

Australia will see more suicides (many news already there students doing it, (Minister , give a thought who is responsible, people?? No...)

People will be felt being cheated by the government, they will give back – they will be unable to pay Australian credit cards (minister go and ask banks how much lending they have given to temporary residents) , they will do fraudulent activities for their bread and butter.

They will hate Australians

Illegal immigrants will be more

What should be done?

I think minster have enough suggestions to go through for how the current applications should be treated

Minister, Put yourself in my shoes, please come out of the attitude and other allergies that you have

Immediate new bill made to take all the suggestions given (immediate approval) by the both Australians and international people on this bill.

Be human

Remember it is a cycle, Karma... it is your choice....best wishes to you if you take the rite decisions.

Sorry for bad spellings & English, Can't bother to spend more time now
