

Dear Sir/Madam,

Thanks for the following reply. Considering the universal fact that only Skills or English are no longer important to gain employment anywhere in the world anymore. The employment market is getting very very complex as the trend, market and the economy is constantly changing.

Many highly skilled people (even Phds') from India and Pakistan end up driving taxi full time in Australia and Canada.

For PR (permenant residency) a legitimate job offer from Australia should be made extremely mandatory and people on 457 visas must have the highest priority to gain permenant residency.

Cheers,
