

Dir Sir/Madam

I am writing to complain about Migration Amendment (Visa Capping) Bill 2010.

I have just heard Australian Government have discussed with Immigration Policy. If such a stupid bill is passed, it is the same as a fraud by Australian Government. It absolutely infringes upon human and property rights of international students. Australia is the same as North Korea and not a democratic country.

I came to Australian from Japan in 2006. I have already spent over \$20,000 to the TAFE College, and applied for S885 visa last year. My wife and I have moved over \$300,000 from Japan to Australia, because we have a plan to have our own bakery in Geelong region. Is our dream something wrong? Do you have a right to rob our dream?

I have been working at Wombats bakery of The Bellarine Peninsula since 2007. The owner got a car accident last June. Due to that I had worked for three months from 2am everyday until he had recovered. If I refused about that, the bakery had to be closed and also the staff would lose their jobs. Do you still say that international students do not contribute to Australian labor market?

My wife and I have been donating money to our local community for four years. This is because many kids have bought our products which are Japanese style sweets, and we also think that we want to contribute something to the community. Do you still say that we do not need our help?

If such a stupid bill is passed, we must go back to Japan. However, Australian people also should leave from Japan immediately, because Japanese labor markets will not need English teachers from Australia.

I am looking forward to hearing you soon.

Yours faithfully,  
Naoya Toyosaki
