

I believe if the senate pass this bill that it will greatly affect people living with disabilities and barriers to employment. This will personally affect me and my family, my brother is currently registered with Break Thru People Solutions Disability Employment Service and I know that without the fantastic help and support this service has and is providing to my brother he would not be where he is today after his workplace injury that left him with no choice but to leave his job and be retrained in a different career. Currently working full time has moved out of home and studying part time. Break Thru is still providing him with great support even though he is working full time. If this service was to one day disappear my brother would be greatly disadvantaged once again.
