

I am writing to the senate committee in regards to the Queensland governments decision to impose blue zones on our property at [redacted], when we purchased the property in 2008, we bought with the intentions to supplement our retirement. The restrictions have virtually made our property worthless. We have a narrow single lane access into our property which creates a huge fire risk. We feel that the decision is unjust, and would like the government representative to come and inspect the property as soon as possible. As far as compensation goes \$2 million would not even cover the stress this has caused and our loss of income and devaluation of our property. We await your immediate response to this matter.

yours sincerely
