
We are writing for the Government to stop the Medicare funding of Gendercide.
It is not our place to end a life because of its gender & should not receive a medicare benefit.
We want a balanced society so people have the pleasure of marriage. Some countries women
Are mistreated etc. with serious social consequences & must learn from their mistakes.
It is a very serious discrimination & violation of human rights.
Please act actively against this for all Australian people.

Yours faithfully,
Peter & Margaret Barritt.
