To the committee,

International terrorism and organized crime is a global threat to peace and security. I would reiterate my previous position that the official names and titles of international terrorist organizations in Australian legislation should match the names used in multinational forums. For example, the proper title in legislation is Islamic State Sinai Province that also has the alternate name in s5 of Islamic State-Sinai Province. The proper name is usually rendered as 'Islamic State – Sinai Province' with a space on either side of the en dash instead of a hyphen.
