RE: Invitation to make a submission to the Senate Economics Committee's re-referred inquiry into non-conforming building products

Dear Secretary

We make our submission as follows:

We believe that the policing and enforcing of existing regulations needs to be upheld – particularly in our area of specialty being building cladding and facades. Independent verification and testing systems need to be monitored for consistency and accuracy.

Please take this in conjunction with our earlier submission into the original inquiry in July last year.

Any queries please contact the undersigned.

Kind Regards,

Ashley How
Technical Manager
