

Your personal experience as an assessor and the sacrifices you made to do this.

I have attended the approved 4 day home Sustainability Assessment short course. I have also obtained a police clearance certificate. I am insured for Public Liability of up to \$10million and have appropriate indemnity insurance for \$2million. I have maintained ongoing professional development and certification and currently have an identifying certified assessor number from ABSA. I have spent over \$3000 for the course, insurance and to become an ABSA member. I have also spent lots of time behind professional development and certification.

How the changes to the scheme have impacted on you, your family and business.  
I have submitted a contract to become an assessor but have not been contracted by the department yet despite all the time and effort I have put into this.

3 ) Measures which could be put in place to revitalise the scheme.

System to more evenly allocate work

4 ) Any other useful suggestions and potential solutions.

5) Details of how to make a submission are set out below.
