Dear Senator Madigan

We would like to voice our support for the proposed bill submitted before parliament, seeking to remove medicare funding for sex selection abortions. We support and encourage the protection of all our most vulnerable in society. We find the notion of abortion, performed for no other purpose than to serve self interest, abhorrent, and especially when the practice is performed for sex selection reasons alone. A community funded medical model like Medicare, was established to provide medical assistance and care to the whole community, for the purpose of encouraging a more egalitarian society. We don't pay our taxes or levies, to fund a procedure that denies a child the rights that we have, the rights we love and the rights we respect and expect from one another.

Thank you for your thoughtful proposition,

Yours sincerely

Mrs Kathrin and Dr Thras Triantopoulos
