

My name is Todd and I am 10 years old. I was conceived using donor sperm. I would like to change the laws about knowing who our sperm donor is. I am very angry that I am not allowed to know more information about my donor. Why didn't the hospital write down the donor's licence number? If they had taken down his licence number it would make it easier to track him down and ask him some questions. If the donor doesn't want to meet me I could ask him for a photo instead. I know I have the right to meet my donor or at least know a lot more about him. Can you please create a computer data base so we can get matched up? I will never stop trying to find out.
