Dear Committee Secretary

Thank you for allowing me to review my transcript. On page 12 paragraph 6 line 4, I spoke the correct proportion all hospital admissions, 11%, as being 0-19 years of age. But I have not used the words 'of all hospital admission' and therefore this could be misinterpreted as the proportion of just cases aged 0-19 years.

Changing this to '5% hospitalised of whom 5% were admitted to ICU' then anyone reading this would correctly interpret this for admissions for just 0-19 years of age.

Thank you.

Mary-Louise
