

I was very disappointed with the decision to scrap youth allowance for inner regional students, it's just so unfair to our young people who are trying to make a go of things.

We dole out money to those who want to sit about doing nothing and send money to countries overseas, but we can't give our students a helping hand. We just wasted 45 million dollars on our bid to FIFA!

My son David wants to go to uni next year, he has to go away to do the course he has chosen to study. He has worked two jobs this year in the hope that he would qualify for youth allowance and also worked hard at his HSC and now we don't know how we are going to afford to send him to uni for four years. Youth allowance would have been a great help.

Please help our students who deserve our support
