

Subject: Dr. Wilma Johnson.

Dr. Wilma Johnson of Channel Dental Care, Kingston, Tasmania has been my dentist and also for my wife Pauline, for quite some time now.

I am a British WW2 Veteran with some of the usual disabilities for a person of my age and background ie heart pacemaker, lymphodema in both legs, very bad tinnitus, some significant hearing loss and some eye problems relating to a slight stroke and cataracts.

What I wish to bring to the attention of the committee is my feeling of disbelief and revulsion when I first heard of the appalling manner and way that Dr. Johnson and many other dentists have been treated by Medicare for what seems to be a retropective requirement to provide paperwork not related to the high quality dental work that was carried out. Dr. Johnsons generous donation of treatment above that required is beyond praise.

Please bring sensibility and reason into changing the cloud under which these innocent dentists have been placed.

Antony John COPE,
