ANSWERS TO QUESTIONS ON NOTICE

Inquiry into Energy Efficient Homes Package (Ceiling Insulation)

Department of the Prime Minister and Cabinet

Question: 1

Topic: Provide Opening Statement

Type of Question: Question on Notice

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 3

Thank you, Ms Beauchamp. Would you care to table your opening statement for the committee?

Answer:

I thought it might be useful for the committee to understand the role of the Office of the Coordinator-General and, in particular, where we fit within the Department of the Prime Minister and Cabinet.

The Department of the Prime Minister and Cabinet has been called separately, but I wanted to clarify that I am actually the Deputy Secretary, Governance in the Department. The Office of the Coordinator-General is a division within the department. I will explain the governance arrangements and the roles and responsibilities, because they are germane to some of the questions and clarifications that the committee may be seeking.

Following the announcement by the Prime Minister of the Nation Building and Jobs Plan on 3 February 2009, the Prime Minister, premiers, chief ministers and the president of the Local Government Association together with Commonwealth, state and territory treasurers, were all involved in a special Council of Australian Governments (COAG) meeting on 5 February 2009. It was at this meeting that it was decided to introduce new implementation and monitoring arrangements for the Nation Building and Jobs Plan. A significant aspect of those arrangements was to maximise the timely and effective delivery of the stimulus projects.

COAG resolved to introduce new implementation and monitoring arrangements, which included the establishment of an oversight group involving centralised Coordinators-General. It also resolved to establish line department coordinators at the Commonwealth and state levels. These arrangements were formalised in the Nation Building and Jobs Plan National Partnership Agreement.

Environment, Communications and the Arts Reference Committee

ANSWERS TO QUESTIONS ON NOTICE

Inquiry into Energy Efficient Homes Package (Ceiling Insulation)

Department of the Prime Minister and Cabinet

The role of the Commonwealth Coordinator-General, with the cooperation and assistance of State and Territory Coordinators-General is to:

- Ensure programs being implemented meet targets as outlined in the National Partnership Agreement;
- Monitor expenditure and roll-out of deliverables;
- Work with states and territories to solve implementation problems that arise in the delivery against COAG milestones; and
- Report to COAG and ministers on these issues.

The Office of the Coordinator-General was established within the Department of the Prime Minister and Cabinet in February 2009 following the agreement from the COAG meeting. For clarification, in terms of implementing the programs, it was very clear both in the COAG communiqué from that meeting and in the subsequent budget papers around the Nation Building and Jobs Plan as well as the Economic Stimulus Plan that line agencies have responsibility for program design and delivery and received funding to undertake that role. The line agencies report to individual ministers and liaise with the Office of the Coordinator-General regarding implementation and progress against milestones.

The Office of the Coordinator-General has worked with the Department of the Environment, Water, Heritage and the Arts in the rollout of the Home Insulation Program, including ensuring that the objectives agreed at the COAG meeting on 5 February 2009 were being met and supported. That clarification is very important in understanding the role of the Commonwealth, the role of the states and territories and the role of the line agencies in the governance arrangements that were put in place.

COAG endorsed the Energy Efficient Homes Package to modernise Australian homes, resulting in the plan to install ceiling insulation in up to an additional 2.7 million uninsulated Australian homes. To complement this program, it was also agreed that the States would maintain existing energy efficiency funding levels, and re-direct state funding for other energy efficiency programs such as insulation programs to home energy advice programs, particularly for the most disadvantaged households. Advice programs, such as home energy audits, were to help households to maximise the benefits of their new insulation and further reduce their energy costs.

States additionally agreed to audit the energy efficiency of their existing public housing stocks, and consider implementing a program for cost-effective upgrades.

Environment, Communications and the Arts Reference Committee

ANSWERS TO QUESTIONS ON NOTICE

Inquiry into Energy Efficient Homes Package (Ceiling Insulation)

Department of the Prime Minister and Cabinet

It was further agreed to examine and resolve additional measures that were to be drawn from the report of the Energy Efficiency Sub-Group of the COAG Working Group on Climate Change and Water to build on the Energy Efficient Homes package and further improve the energy efficiency of residential and commercial buildings across Australia:

- significantly increase energy efficiency requirements for all classes of commercial buildings in the Building Code of Australia from 2010;
- ensure greater consistency in the application of building standards across all States;
- phase-in mandatory disclosure of the energy efficiency of commercial buildings and tenancies from December 2009;
- increase energy efficiency requirements for new residential buildings to six stars, or equivalent, nationally by 2010; and
- introduce mandatory disclosure of residential building energy, greenhouse and water performance at the time of sale or lease by 2010.

The use of the Commonwealth's on-line portal was also agreed as a single point of inquiry for all energy efficiency programs for households and businesses, and that a key part of the COAG National Energy Efficiency Strategy be a commitment from Commonwealth and State governments to improve the energy efficiency of their own operations. States also re-committed to expediting the national roll-out of electricity smart meters, agreed by COAG in April 2007.

Question: 2

Topic: Reports to Cabinet

Type of Question: Question on Notice

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 1

I ask the office on notice to provide as many as those documents as you are able and then to indicate which you are unable to provide and on what basis.

Answer:

The Department provided briefings and papers for Cabinet Committee meetings on a number of occasions. Copies of these briefings and papers are not provided.

The Department provided four briefings to the Prime Minister between August 2009 and March 2010 concerning the Home Insulation Program. Those briefings referred to and were about the deliberations of Cabinet concerning changes to the Home Insulation Program; therefore copies of these briefings are not provided.

Briefing papers were prepared for the Prime Minister about the overall Nation Building – Economic Stimulus Plan (the Plan) for Council of Australian Governments (COAG) meetings in April 2009, July 2009 and December 2009. These papers were about the deliberations of COAG and therefore copies of these briefings are not provided.

In response to correspondence from the families of two deceased insulation workers, the Department prepared two briefings and associated draft responses for the Prime Minister in February and March 2010. Copies of these briefings and letters are not provided, as their disclosure may unreasonably breach the privacy of individuals.

The Department provided reports to Minister Arbib on overall progress of the Plan between October 2009 and February 2010. Relevant pages of reports that contain information about the Energy Efficient Homes Package, including the Home Insulation Program are attached.

ENERGY EFFICIENT HOMES PROGRESS

MONTHLY REPORT TO
31 OCTOBER 2009

Achievements – Energy Efficient Homes Package

Highlights and Potential Issues:

- The take up of home insulation has increased substantially with a further 160,000 claims received in October 2009.
- The majority of funding for insulation has been paid against claims from NSW (43%) and Queensland (34%) and for solar hot water claims primarily claims from NSW (66%).
- The data for Solar Hot Water – Applications Received shows a significant reduction on previous months' figures. DEWHA advise that early data was inflated due to double counting.
- Complaint levels have been low, tracking at less than 0.5%
- At end October around 9,000 businesses are registered with over 7,000 actively submitting claims.
- On 2 November 2009 changes to the insulation program were announced reducing the rebate cap to \$1,200 and issuing revised guidelines which provide a greater focus on safety and compliance.

Nation Building ECONOMIC STIMULUS PLAN

ENERGY EFFICIENT HOMES PROGRESS

MONTHLY REPORT TO
30 NOVEMBER 2009

Achievements – Energy Efficient Homes Package

Highlights and Potential Issues:

- The take up of home insulation has increased further with over 200,000 claims received in November 2009 (this is expected to reduce into January with the new measures coming into effect on 1 December 2009)
- The majority of funding for insulation has been paid against claims from NSW (43%) and Queensland (32%) and claims for solar hot water primarily coming from NSW (66%).
- 9,820 installers are registered, as at 26 November 09.
- The high take-up rate of the insulation program indicates that funding will be exhausted earlier than anticipated – it is too early to gauge the impact on demand that the two quote requirement and reduced rebate will have.
- 86% of Solar Hot Water applications received has been paid and applications rates remain high.

Topic: Cost Benefit Analysis

Type of Question: Question on Notice

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 1

Are you aware of or do you have in your possession a cost-benefit analysis of the housing insulation program?

Answer:

The benefits of installing insulation into homes were investigated prior to the commencement of the Home Insulation Program (HIP), these benefits include improved energy efficiency and reduced energy costs for householders.

The costs associated with installing insulation in homes were also investigated.

Details of any analysis provided to the Government in the development of the HIP are Cabinet-in-Confidence and are not able to be provided to the Committee.

Is there written material relating to that and can we have a copy of it?

Answer:

There was an e-mail from Mr Hook to Mr Mrdak on 9 June 2009. The text of that e-mail is provided below.

Environment, Communications and the Arts Reference Committee

ANSWERS TO QUESTIONS ON NOTICE

Inquiry into Energy Efficient Homes Package (Ceiling Insulation)

Department of the Prime Minister and Cabinet

From: Hook, Rod (DTEI)

Sent: Tuesday, 9 June 2009 3:13 PM

To: 'Mrdak, Mike'

Cc: 'Andrew.Wilson@pmc.gov.au'

Subject: FW: Weekend Australian article and insulation issue [SEC=UNCLASSIFIED:NO CAVEATS]

Hi Mike,

Comment on the registration of insulation installers follows. I will respond separately on Cleve School.

(a) South Australia has a requirement for insulation installation to be undertaken by licenced installers. This pre-dates the Nation Building Economic Stimulus Plan initiatives. Any person or business seeking to install or retrofit insulation in South Australia, whether under the rebate program or otherwise, must be licensed under the *Building Work Contractors Act 1995*. They must have (1) a building work contractors licence which includes insulation within its scope; and (2) the person or business must also nominate a registered supervisor/s who will be present for all work and who has insulation in their scope of competencies. The licensing requirements apply to both principal contractors and sub-contractors. Any plumbers or electricians seeking to diversify their businesses to include retrofitting insulation, and who are currently separately licensed under the *Plumbers Gas Fitters and Electricians Act 1995*, must also apply for a building work contractor licence and supervisor registration as outlined above. Licensing is managed by the SA Office of Consumer and Business Affairs (OCBA).

(b) As at the beginning of June 2009, of the 96 installers who had indicated their interest as part of the Australian Government's pre-registration process, only 40 have relevant licensing in SA. The balance (56) would essentially be "new entrants" requiring licensing. A further influx of license-related applications (contractors and supervisors) may be expected following the Australian Government's planned broad-scale communications (ads, forums and more) through June and July 2009.

(c) My Coordinator General office has been working closely with OCBA since the announcement of the insulation rebate program to determine opportunities to streamline and fast-track licensing processes in SA for insulation installers to maximise early rollout capacity and job/stimulus creation in SA. A typical license application for building work currently takes about 6-8 weeks (not the 6 months indicated in the issue raised with your office). By instituting fast-track mechanisms, OCBA is expecting this period could be reduced to under a month and possibly less (where scope of work is limited to insulation). This includes completion of any necessary insulation course. Fast-tracking mechanisms include:

- 48 hour turnaround to verify that those seeking to enrol on the Australian Government's register, and nominating SA as their geographic area of work, have appropriate licensing in SA. Those not having appropriate licensing will be diverted to a fast-track process developed specifically for ceiling insulation installers
- An additional 2 dedicated licensing officers to March 2010 to deal with the expected influx of ceiling insulation-related applications during rollout of the program

Environment, Communications and the Arts Reference Committee

ANSWERS TO QUESTIONS ON NOTICE

Inquiry into Energy Efficient Homes Package (Ceiling Insulation)

Department of the Prime Minister and Cabinet

- "Priority service" negotiated with SA Police Department for national police certificates (licensing requirement)
- Creating a new endorsement for building work contractor licences which can be limited to "ceiling insulation" only. This will confine the competencies necessary to be demonstrated and speed assessment. It does not prevent the applicant seeking a broader scope of work if they choose to, either initially or at a later time.
- Removing the need to demonstrate the \$8,000 minimum asset base in order to obtain the building work contractor licence where scope is limited to ceiling insulation only. Any risk associated with removing this requirement is countered by the Australian Government's requirement for registered installers to have appropriate insurance.
- Seeking formal recognition by the Commissioner for Consumer and Business Affairs of the competencies relevant for insulation installation, to both support the new restricted endorsement, and to ensure that competencies for licensing align with the Australian Government's registration requirements.
- Working directly with the Master Builders Association of South Australia (MBASA) to ensure availability of insulation installation courses for license applicants from June 2009, both in metropolitan and regional areas. This does not prevent other registered training organisations from taking up or delivering the course competencies, but ensures capacity for fast rollout and accessibility, as well as ability to schedule additional courses to meet demand as necessary. MBASA's role would include:
 - default provision of insulation installation competencies, particularly during the June to August period to service the initial influx of new licensing applicants
 - default/dedicated provision of the course in regional areas based on demand collated by OCBA through the licensing process
 - developing and managing simulated practical assessment (alternative to on-job assessment) to speed course completion and attainment whilst maintaining robustness of that assessment e.g. building of in-situ roof spaces which are also portable to regional areas
 - working directly with the Construction Industry Skills Board of SA to gain recognition of the insulation installation course for training subsidy purposes (this is unique to SA and has capacity to provide up to 50 per cent or more of the cost of training for applicants).

(d) I am aware that the SA State Coordinator for the insulation program has made representations to his Commonwealth counterparts about support for fast-tracking of licensing processes in SA. His proposal also includes an integrated model for communications, complaints, investigations, auditing and enforcement related to the insulation program in SA. This is subject to further discussion between the parties.

(e) A further model is currently being developed to ensure "hard to get" households and markets in SA are serviced by the insulation program (i.e. rental, low income, special needs, and remote). This includes an initial trial for Northern Suburbs areas of Adelaide and targeted rollout across the State. This is intended to maximise penetration of insulation (and hot water rebates) in these markets as well as further job creation/stimulus with a focus on transitioning

Inquiry into Energy Efficient Homes Package (Ceiling Insulation)

Department of the Prime Minister and Cabinet

Question: 10

Topic: Changes to Guidelines

Type of Question: Question on Notice

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 4

Do you have a grid that summarises what got changed and when?

Answer:

There have been significant changes to the Home Insulation Program Guidelines since being first issued in early 2009. Each time the requirements for the training and competency of installers were increased and tightened.

The Department of the Prime Minister and Cabinet has been advised by the Department of Environment, Water, Heritage and the Arts of the key changes including:

Timeline of changes in standards	
Phase 1: Early Installation	
Between 3 February 2009 and 30 June 2009	<p>Interim guidelines were issued (<i>Early Installation Guidelines</i>) which required insulation:</p> <ul style="list-style-type: none">a) be installed by the owner or employee of a registered business (with an Australian Business Number) operating in the installation of thermal insulation;b) be installed to various Australian Standards and comply (as a minimum) to a specified R-value;c) be new ceiling insulation material installed in an existing dwelling (not an extension or a new dwelling covered by mandatory thermal performance requirements for new housing under the Building Code of Australia); andd) be installed in the householder's principal residence. <p>There were no specific training or competency requirements.</p> <p>Householders were not allowed to install their own insulation. Insulation had to be installed by suitably trained and experienced installers or under close supervision.</p> <p>Government housing was not eligible for assistance under the Program.</p>

Environment, Communications and the Arts Reference Committee

ANSWERS TO QUESTIONS ON NOTICE

Inquiry into Energy Efficient Homes Package (Ceiling Insulation)

Department of the Prime Minister and Cabinet

Phase 2: Home Insulation Program	
From 1 July 2009	<p>Under relevant laws, installers have obligations and a duty of care to their employees, contractors and sub-contractors to provide a safe work environment, safe systems of work, and adequate training and supervision.</p> <p>Installers were required to comply with minimum competency requirements and those who failed to provide evidence of minimum competency were not eligible to participate.</p> <p>The Guidelines mandated insulation be installed by an installer listed on the Program's Installer Provider Register:</p> <p>a) OHS induction training required for all installers.</p> <ul style="list-style-type: none">• This is evidenced by:<ul style="list-style-type: none">○ OHS induction card <u>OR</u>○ White Card <u>OR</u>○ Statement of attainment from an Registered Training Organisation (RTO) against CPCCOHS1001A Work Safely in <i>the Construction Industry</i>. <p>b) Business/ Installer was required to provide evidence of 1 of 3 competencies and ensure every installer was supervised by a person who had one or more of the following:</p> <ul style="list-style-type: none">• A relevant trade qualification; or• Completed insulation installation training;• Have 2 years prior experience in installing insulation. <p>To register on the Installer Provider Register, installers were required to provide the following information:</p> <p>a) The name of the organisation which must be a "legal entity", i.e. a registered company, incorporated association or body corporate established by statute or the name of an individual, including trading name(s);</p> <p>b) The Australian Business Number of the organisation;</p> <p>c) Contact details; and</p> <p>d) The geographical area where insulation installation services would be provided.</p> <p>Installers had to also:</p> <p>a) provide proof that they met the minimum competency standards including state and territory requirements;</p> <p>b) provide proof that the specified insurance was held;</p> <p>c) accept the Terms and Conditions of Registration.</p>

Environment, Communications and the Arts Reference Committee

ANSWERS TO QUESTIONS ON NOTICE

Inquiry into Energy Efficient Homes Package (Ceiling Insulation)

Department of the Prime Minister and Cabinet

Timeline of changes in standards	
	<ul style="list-style-type: none">• Installers who did not comply with the Terms and Conditions of registration may be removed from the Installer Provider Register.
From midnight on 1 September 2009	<p>Installers were now required to provide evidence of qualifications and/or competencies at the time of registration. Currently registered installers were required to provide evidence of qualifications and/or competencies as part of the compliance strategy. New installers were required to provide this information before they could be included on the Installer Provider Register.</p> <p>When advertising, installers had to report that "householder eligibility criteria apply".</p> <p>Physical site inspection was required before providing a quote.</p> <ul style="list-style-type: none">• Every householder wanting an installation was required to obtain a written quote from an installer based on a physical site inspection except in remote areas where special provisions applied. The quote had to contain details of the insulation product type, the insulation R-Value, the area to be insulated, total cost (GST inclusive), breakdown of the cost including price per square metre, labour and materials. Multiple quotes were recommended for comparison purposes.
From 2 November 2009	<p>Ceiling insulation installation must now include the use of an appropriate cover over down lights and other relevant ceiling appliances, as approved and installed in accordance with relevant Australian Standards. This is a key safety fire protection. Where it is not possible or appropriate to install a cover (e.g. due to space limitations in flat ceilings) installers must still leave the minimum clearance distance required under the relevant Standards.</p> <p>Ceiling insulation must now be installed without the use of metal staples or other metal fasteners to fasten insulation products as an electrical safety measure. Taping of fastening with nylon/plastic staples or any other non metallic means was permitted.</p> <p>Introduced a targeted electrical safety inspection program of Queensland homes with foil insulation installed under the Program.</p>

Department of Prime Minister and Cabinet

Question: 11

Topic: Briefings to PM or Cabinet

Type of Question: Question on Notice

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 1

Mr Mrdak, you confirmed that there were none earlier than that. Mr Mrdak—Not that I am aware of. Senator BIRMINGHAM—Can you take it on notice if there is a level of doubt there. Mr Mrdak—Certainly.

Answer:

The Office of the Coordinator-General provided briefings for Cabinet Committee meetings from time to time on the rollout of the Economic Stimulus Plan and its performance against COAG agreed milestones. The contents of these briefings are Cabinet-in-Confidence.

Question: 13

Topic: Concerns about accreditation, training and registration standards

Type of Question: Question on Notice

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 1

When did the environment department and the Office of the Coordinator-General or the Department of the Prime Minister and Cabinet first have an exchange about concerns that the accreditation, training and registration standards were not adequate enough

Answer:

As advised to the Committee at the hearing and as detailed in the answer to Question 10, changes to accreditation, training and registration standards were made throughout the Program. The Office of the Coordinator-General has been involved in discussions regarding these standards throughout the delivery of the Home Insulation Program.

Question: 15

Topic: Employment Outcomes

Type of Question: Question on Notice

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 1

In terms of the employment impact, I might have to ask Mr Hoffman. I have not got those figures in front of me, but we can certainly take those on notice.

Answer:

The Department of the Prime Minister and Cabinet does not hold employment data for insulation installers. Estimates had been made about the workforce based on the assessment of insulation installer business information provided under the management of the program by the Department of Environment, Water, Heritage and the Arts.

To confirm the answer provided at the Hearing, the Department of the Prime Minister and Cabinet had been advised by the Department of Environment, Water, Heritage and the Arts that as of December 2009, there were 6,313 registered installer businesses. Each registered installer business was assumed to have two installers at a minimum, which led to the estimate of 12,000 individuals.

Question: 17

Topic: Effects of closing the program

Type of Question: Question on Notice

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 1

On the issue of jobs, Ms Beauchamp, I understood you said that you have achieved your employment outcome, but clearly the vast majority of the workforce has now been sacked. Is that right? Is that your understanding? Ms Beauchamp—No, it is not my understanding. As there were a number of more stringent requirements put in place around audit and compliance the number of businesses involved in installation declined and as I said previously I would have to take on notice exactly those employment numbers you are seeking. Senator BARNETT—What is your estimate of, firstly, the total number involved in the workforce and, secondly, those affected by the closure of the program? Ms Beauchamp—I would not like to speculate. Senator BARNETT—You do not know? You have no estimate? You are not aware of an estimate? Ms Beauchamp—I am not aware of an estimate and will have to take that on notice.

Answer:

Please refer to the answer provided to Question 15.

Environment, Communications and the Arts Reference Committee

ANSWERS TO QUESTIONS ON NOTICE

Inquiry into Energy Efficient Homes Package (Ceiling Insulation)

Department of the Prime Minister and Cabinet

Question: 19

Topic: Communication with Bereaved or victims of house fires

Type of Question: Question on Notice

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 1

Have you or your department or the Prime Minister communicated with any of the families affected by the house fires and/or the deaths? I am aware that the Prime Minister has publicly said that he has written to one of the families regarding one of the deaths. Ms Beauchamp—That is correct. That is the communication I am aware of. Senator BARNETT—Are you aware of any other communication with the other three families or about the 93 house fires? Ms Beauchamp—No, I am not aware. Senator BARNETT—Can you take that on notice and check? Ms Beauchamp—I can certainly check from the department’s point of view, but I am not sure what contact the minister or minister’s officers may have had.

Answer:

The Department of the Prime Minister and Cabinet has not communicated with any of the families of the four deceased persons or those impacted by the house fires.

The Prime Minister has corresponded with two of the families of deceased insulation installers.

Question: 24

Topic: Briefs

Type of Question: Question on Notice

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 1

Can we have copies of all related briefs about the Home Insulation Program or at least the dates on which they were provided to the Prime Minister, to the Prime Minister's office, to Minister Arbib and to cabinet—so the sequence of dates on which they were provided relating to this program. Mr Mrdak, you confirmed for us that there was no brief sent to, nor any brief requested by, the Prime Minister or Minister Arbib after the first death on 25 October. Were there any briefs sent or requested after the second death in November or the third death in November? Of course, we are quite sure there were after the fourth death, by February, but were there any in relation to the second or third?

Answer:

Please refer to the answer provided to Question 2.

The Department of the Prime Minister and Cabinet did not prepare briefings for the Prime Minister or Minister Arbib immediately following each of the deaths of installers. In response to correspondence from two of the families of deceased workers, briefings and draft responses were prepared for the Prime Minister in February and March 2010.

The Department prepared background briefing papers for the Prime Minister's Office in February 2010.

Topic: Support Mechanisms

Type of Question: Written

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 1

What proportion of wages will former insulation installers expect to be paid under the support mechanisms being offered by the Government? How much will former insulation installers be paid under the support mechanisms being offered by the Government? How quickly is this support available? When can the first installer expect to receive a financial payment?

Answer:

It would be appropriate to refer these questions to the Department of Employment, Education and Workplace Relations.

Environment, Communications and the Arts Reference Committee

ANSWERS TO QUESTIONS ON NOTICE

Inquiry into Energy Efficient Homes Package (Ceiling Insulation)

Department of Prime Minister and Cabinet

Question: 28

Topic: Financial Support to Installers

Type of Question: Written

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 1

What financial support exists for businesses involved in installing insulation? What assistance is there for these businesses to pay rent? What assistance is there for these businesses to pay for orders of stock made prior to the suspension of the program? What tax relief is available to these businesses? When, if at all, can the first insulation installation business expect to receive a payment? How many of these businesses existing prior to the suspension of the Home Insulation Program? How many does the Government estimate have or will exit the business before resumption of the program?

Answer:

The Government has announced measures to assist workers affected by the cancellation of the Home Insulation Program.

The Government's key announcement about assistance can be viewed at:

<http://www.pm.gov.au/node/6500>

Specific information about assistance can be viewed at:

<http://www.keepaustraliaworking.gov.au/pages/InsulationWorkersAdjustmentPackage.aspx>

http://www.economicstimulusplan.gov.au/work_opportunities/pages/default.aspx

The Department of the Prime Minister and Cabinet is not in a position to estimate the number of installer businesses that might seek or be accepted for registration under the Renewable Energy Bonus Scheme.

Department of the Prime Minister and Cabinet

Question: 30

Topic: Consultation

Type of Question: Written

Date set by the committee for the return of answer: 9 March 2010

Number of pages: 1

What consultation took place with state governments prior to the suspension of the program? What consultation took place with the states prior to the announcement of financial assistance for those impacted by the suspension? What role will the states have in providing or coordinating assistance? What consultation is taking place with the states in relation to the design of the new program?

Answer:

The Department of the Prime Minister and Cabinet has regular phone link ups with State and Territory Coordinators-General on a fortnightly basis.

Prior to the announcement of the termination of the Home Insulation Program, two additional phone link ups were convened by the Commonwealth Coordinator-General with State and Territory Coordinators-General. These meetings focussed on the responsibilities of State and Territory Governments with respect to Occupational Health and Safety, building regulation and complaints handling.

There was no consultation with State and Territory Governments about the termination of the Program.

Consultation with the states and territories on the new program will be the responsibility of the Department of Climate Change and Energy Efficiency.
